

Why Use File sharing?

SECURITY

The use of file sharing provides a secure pathway in which files can be shared without fear of wrong parties getting access.

Over 200,000 files are shared per day

FLEXIBILITY

With the document securely stored online, changes can be made by multiple parties without the confusion of which document is the latest version.

Over 200 million emails are sent per day

ACCESSIBILITY

Email attachments have limits. Some attachments can even trigger spam filters. File sharing bypasses all those hassles by offering no file size limits.
